Objective

I am a detail-oriented individual seeking a position of Senior Software Quality Assurance Analyst/Engineer with years of experience in Q.A. concepts, testing tools and test automation (BDD/TDD frameworks), building test pipelines from ground up in a fast-growing and reputable Software Company to help take their high-quality software to the next level of automation by collaborating with a wicked smart team to build cutting-edge products that are changing the way our cities and counties run. I take quality seriously and regard it as a critical element in maintaining epic levels of customer retention in a bid to solve both local and global problems for today's businesses.

Skills

- Proficient using Cypress UI TestAutomation with JS testing frameworks(Jest, Mocha, Chai, Cucumber,Jasmine)
- Testsigma no code test automation
- Fireflink no code tool
